

## DATA ANALYSIS (BAR GRAPHS)

Which endangered animal  
is heavier,  
Tiger or Leopard?

As many as 26,000 species are threatened with extinction in the world because people have changed their habitats, and they lost their homes. The bar graph below shows the weight of some of the most endangered animals in the world.

Weight of endangered animals

1. Among the endangered animals, which animal weighs the most?
2. Which is heavier, Amur Leopard or Sumatran Orangutan?
3. Which endangered animal weighs twice as much as Hawksbill Sea Turtle?
